Create product

To scan a barcode when adding items to an invoice or purchase, tap the barcode icon in the product search field. To print barcode labels, open a product and click **Print Barcode**.

5. Purchase Entry

Add suppliers first under **Suppliers** if not already added (name, PAN, phone). Then go to **Purchases → New Purchase**:

1. Select the supplier
2. Enter supplier bill number and date
3. Add products by name, SKU, or barcode scan with quantity and cost
4. Click **Save Purchase**

Stock is updated automatically. The purchase appears in the Purchase Register.

New Purchase Entry

Enter a whole supplier bill at once — many products, each with its own variants.

This is a computer generated invoice issued as per IRD
regulations.

7. Quotation

Go to **Sales → New Quotation**. The process is identical to creating an invoice. Quotations are not tax documents and are not submitted to IRD.

To confirm and bill the customer, open the quotation and click **Convert to Invoice**.

To cancel, click **Void Quotation**. Only quotations can be deleted — finalized invoices cannot.

8. Credit Note

To reverse a finalized invoice, go to **Sales → Invoices**, open the invoice, and click **Issue Credit Note**. Select the items being returned and enter the reason.

The credit note gets its own sequential number and restores stock for returned items.

9. Reports

Go to **Reports**. Select a report, choose a date range, and export as XLSX or PDF.
